

## Map Layers Documentation

*(Updated January 8, 2018)*

### Introduction:

The following five topics form the organization structure for the atlas:

1. Population and Demographic Characteristics of the Region
2. Access to Affordable, Quality Housing Options
3. Access to Jobs and Economic Development Opportunities
4. Access to Educational Opportunities
5. Access to Health Care, Healthy Foods, and Recreational Facilities

Data was collected from a variety of sources\*\* for ten counties in the Denver Metropolitan region: Adams, Arapahoe, Boulder, Broomfield, Clear Creek, Denver, Douglas, Gilpin, Jefferson, and southwest Weld. Geographic information system (GIS) software was then used to spatially analyze the data and produce maps for each topical area. Each atlas map from the original publication contains the current and future transit network, including rail lines, as the base map.

This document outlines each map layer in the current website application, and the general description of what is visualized, including the contributing and original sources, and related metadata. For questions not answered through this resource document please contact the following:

If you have questions pertaining to the data sourced for the atlas or would like to request a download please contact the [Colorado Data Engine](#).

For all other inquiries, comments, or suggestions concerning the atlas site functionality and user experience please email us at [support@drcog.org](mailto:support@drcog.org).

For general questions related to using the site please see the [FAQ document](#).

\*\*All data sets coming from the Data Engine can be queried through the API with the 'The Denver Regional Equity Atlas' tag.
